[21.2 Jaggaer Release](#)

New Features Impacting End Users

[eProcurement (Click here for Release Notes/Video)](#)

- **NEW SHOPPING EXPERIENCE Coming November 2021!**
  - Attention Shoppers, Requesters and Approvers! A new shopping experience is coming soon! To check out the updated look and feel, [log into QA](#) and click on

    the toggle button in the bottom right hand corner   . You'll notice that the checkout screens look most different. Jaggaer is still improving and adding functionality to the New Shopping Experience so if you cannot find a feature you're currently using today in the Classic Experience, please let [Annie Teav](#) know and we'll be sure to locate it or let Jaggaer know it's missing.

Supplier Management

- No updates

[Sourcing (Click here for Release Notes/Video)](#)

- **Ability to Hide the "Price Component" Section**
  We are not currently supporting the Price Component feature with our business process. This section is now hidden from all Sourcing Events created 07/26/21 and forward.
- **Ability to Hide the "Additional Items" Section**
  We are not currently supporting the Additional Items feature with our business process. This section is now hidden from all Sourcing Events created 07/26/21 and forward.
- **[NEW SOURCING SEARCH EXPERIENCE](#)** (reminder from the 21.1 Release)
  Users can opt into the new search experience in production by accessing *"Sourcing > Sourcing Event > Search Events".* At the bottom right hand corner, click the toggle button and select "New Search", then "Save".

  - Users who opt into the new search interface can access more than a dozen new Status Flags that enable searching by such options as multi-stages, prices, scoring, and workflow.
  - These users can also find two new Post-Search Filters that enable them to limit their search retrieval by buyer participants and assigned commodity codes.

Contracts+ (Click here for Release Notes/Video)
Feature: Automatic Metadata Updates when Placeholders Change Changes to placeholders in the Jaggaer Word App will automatically be presented in a "change screen" to accept or reject and for easier identification, Users also will have less risk with only updating the Word App as now, the Contract Header Sections in the Application will automatically update once changes have been accepted.   **Feature: Review Round Improvements** Initiating Review rounds are more simple than ever. The "review round buttons" are easier to locate and we now have the ability to schedule automated internal review rounds-- look out for the implementation of the new automated review rounds feature in a future maintenance period!   **Feature: Ability to change display of optional fields by Contract Type** We now have the ability to hide/unhide fields in the Additional Fields section when setting up a Contract. Now, if we are not using a flex field, we are able to hide the field and only add it as necessary. The edit to these settings will take place during a future maintenance period.
