Executive Summary

Data collection, management, reporting and disaggregation are all critical elements that support program improvement for Schools Uniting Neighborhoods Community Schools (SUN CS). SUN Community Schools employ culturally responsive practices to reduce learning barriers and build on student and family assets, promote racial equity, and support family stability. Having a new database system that employs new technologies, and supports data collection and reporting for SUN CS daily operations and programming, will greatly enhance data collection, reporting, and evaluation efforts.

Program Summary

ISSUE: The data collection and reporting tool currently used by SUN CS (Community Services - ServicePoint) is an outdated technology solution that is focused on federal Housing and Urban Development (HUD) requirements that do not align with SUN CS programming and service delivery model. The reporting platform (ART) is unstable and causes many challenges for SUN Site Managers as they rely on daily ART reports to conduct day to day operations at schools.

PROGRAM GOALS: With a new database system that employs the latest technologies, students and families will be able to search and register for afterschool activities within their respective sites, SUN Site Managers will be able to easily track student enrollment and attendance, and program staff (internally and externally) will have easy access to data for reporting, program improvement and evaluation purposes.

PROGRAM ACTIVITY: These one-time-only (OTO) funds will complement the purchase and implementation costs associated with a new technology solution. These funds will be used for the platform set up, implementation, data integration, and customized report development costs associated with the first year of implementation.
