

LOCAL ALERT!

LOCAL ALERT - Recent testing found high levels of toxic lead in Diep Bao (kemdiepbao.com) skin cream product. Lead poisoning is particularly dangerous for children. Even a little lead can make children slower learners and damage developing brains. High levels of lead can cause coma, seizures and death. If you use this cream on your child, please stop and call your doctor to arrange for a blood lead test.

Call the Leadline at 503.988.4000 to speak with a specialist if you have questions. Vietnamese interpreters available.
