Executive Summary

The Clinical Infrastructure (Quality and Support) Program provides pivotal oversight by managing the Bureau of Primary Health Care (BPHC) grant, developing and implementing fiscal accountability programs and access to health care, initiating and sustaining clinical and administrative quality and safety activities and improvements, and coordinating adherence to healthcare standards and regulations.

Program Summary

This program supports services within the project scope of the BPHC grant, which has continued to increase since our initial award in 1977. The funding is significant and facilitates the mission of increasing access to needed health services to the County's most vulnerable. BPHC funding requires strict adherence to federal laws mandating which services must be provided as a Federally Qualified Health Center (FQHC) which results in additional Medicaid revenue for Oregon Health Plan clients. This funding requires quality services, performance audits and responsiveness to new methods of delivering safe and quality care. Infrastructure and support assures that these efforts are maintained at acceptable thresholds.

This program measures clinical standards/outcomes, quality, safety and fiscal accountability with other similar health delivery systems. The BPHC, JCAHO and NCCHC are our primary external benchmarking organizations relative to performance indicators. Program includes work with the Community Health Council, client feedback results, and collaborations with other health care delivery systems.

This program supports Patient Centered Primary Care Health Home programs and represents an opportunity for new healthcare funding based on performance and outcomes. These programs, implemented to meet goals of the State of Oregon's 1115 Medicaid Demonstration Accountability Plan and local Coordinated Care Organizations Pay-for-Performance, may have payments tied to achieving specific health outcomes or state metrics for quality. The Quality Assurance program is tasked with designing, testing, and implementing the wide array of system improvements needed to meet these new benchmarks.

Significant Program Changes

Last Year this program was: FY 2015: 40034 Quality Assurance

Healthcare transformation, including the foundational work of the Center for Medicare and Medicaid (CMS) Center for Innovation, the Affordable Care Act and Oregon's 1115 Medicaid Demonstration project have changed the way we think about and invest in quality improvement and improving health outcomes. During this transition to more performance based care, it will be important to provide quality and IT support to demonstrate evidence of quality improvement and other metrics.
