### **Executive Summary**

The adult Recognizance (Recog) unit and Pretrial Services Program (PSP) unit both perform functions necessary for public safety and the effective operation of the local justice system. By assessing a defendant's probability to re-offend and conducting interviews and assessments to determine release eligibility, the Recog and Pretrial units allows for scarce jail beds to be reserved for higher risk offenders.

#### **Program Summary**

The Recog unit is a 24-hour, seven day a week program that is housed at the County Jail. From expedited release for low risk defendants, to detention holds, to in depth custody placement, Recog staff have the knowledge, expertise, and tools necessary to make preliminary decisions in the best interest of the community. They interview defendants who have a pending Multnomah County charge, which in turn provides a comprehensive, objective, and valid system for release decisions based on victim and community safety along with the defendant's flight risk. Defendants charged with felonies and/or person-to-person misdemeanor crimes are subject to a full criminal history and warrant check in addition to the standard risk screening.

The screening tool used to guide Recog staff has been validated by an independent research group and the results of that study have been approved by the Community Justice Advisory Council. In addition to evaluating flight risk and recidivism. Recog staff also assist the court with release decisions for those defendants that are ineligible for release by Recog staff and serve as a 24 hour link between law enforcement agencies and Parole/Probation officers, by coordinating the process of holding parole and probation violators in jail and providing after hours information on high risk individuals who are on electronic monitoring.

The primary mission of the PSP unit is to evaluate the risk of releasing defendants prior to trial, to supervise defendants in the community and to ensure that defendants attend court hearings. PSP staff use evidence based criteria during their investigations to determine whether or not a defendant is likely to pose a safety risk or further is likely to attend subsequent court hearings. The results of these investigations are presented back to the Court. When the defendant is released under PSP supervision, the assigned case manager monitors the defendant's behavior and actions through home, community and office visits, telephone contacts and in some instances electronic and Global Positioning Software (GPS) is used.
