#### **Executive Summary**

The Assessment and Evaluation (A&E) Program is a Behavioral Rehabilitation Services (BRS) short term residential program designed to provide temporary structure, stabilization and treatment readiness. The assessment and evaluation program serves youth who may otherwise be in detention awaiting a community placement. The goal of this program is to provide a safe place where youth and family can make longer term plans for the youth.

### **Program Summary**

The BRS A&E program is a voluntary program for male and female youth, ages 13-17, who require a staff secured, out of home placement for assessment/evaluation, stabilization and transition planning. The average length of stay is 45 days, but youth may be enrolled for up to 90 days based on individual needs. Capacity for the program is 16 youth. This program serves approximately 75 youth per year. Participants receive a comprehensive assessment administered by a licensed mental health professional using the evidence-based Global Appraisal of Individual Needs (GAIN) tool, as well as a service plan that is developed by the Primary Counselor, parent (guardian) and the youth.

Each youth in the program has an individualized service plan that reflects how the program will address the youth's issues, describes anticipated outcomes, and is reviewed and approved by the youth and the parent/guardian. Additional assessments (alcohol and drug, psychiatric medication) may be provided as indicated as well as assist in obtaining assessments in the community (psychological or psycho sexual). The core philosophy of the program is to provide holistic, trauma-informed, client- and family-focused services for young people and their families, engaging youth in an array of services with consideration given to their developmental levels, gender needs, cultural background, community support, parental involvement, and other social support. The program follows best practices for trauma-informed care and has adopted a model which emphasizes strength-based and cognitive-behavioral interventions. Services also include individual and group counseling in a culturally responsive environment, skill training, family counseling and parent training.
