4.1 - ZONING DISTRICTS AND ZONING MAP

§ 39.4000 ZONING DISTRICTS

Unincorporated Multnomah County is divided into zoning districts, which describe the uses and standards allowed on lands within the adopted boundaries of the zoning districts. Zoning districts are also referred to as "zones" or "districts" throughout this Zoning Code and the terms can be used interchangeably. In addition to the underlying base zoning districts, there are overlay zoning districts that describe additional standards on lands within the adopted boundaries of the overlay district. Overlay districts are also referred to as "overlay zones" or "subdistricts" throughout this Zoning Code and the terms can be used interchangeably.

§ 39.4005 ZONING MAP

(A) The designations, locations and boundaries of the respective districts and certain combinations thereof described in this Chapter are established as shown by appropriate color designations, symbol or short title identification upon the Multnomah County Zoning Map. The Zoning Map consists of a series of bound and indexed Sectional Zoning Maps numbered sheets until such time as the districts and subdistricts depicted on each respective Sectional Zoning Map are replaced by maps generated as electronic layers within a Geographic Information System (GIS). All GIS Zoning Maps replacing the Sectional Zoning Maps shall be legislatively adopted. The GIS-generated Zoning Maps depicting districts and subdistricts shall be periodically readopted to reflect more accurate mapping information as it becomes available. The Zoning Map and all pertinent information shown thereon is incorporated herein and is to be deemed as much a part of this Chapter as if fully set forth; however, if a conflict appears between the Zoning Map and the written portion of this Chapter, the written portion shall control.

(B) A paper version of the Zoning Map and each amendment thereto shall be and remain on file in the office of the Planning Director.

(1) The set of paper Zoning Maps with the cover page dated the 15th of November, 1962 and signed by the Board shall be deemed to be the accurate depiction of:

(a) The Zoning Maps first adopted for successive geographic areas from April 19, 1955 through December 11, 1958; and

(b) The Zoning Maps in effect from the date of first adoption through November 15, 1962.

(2) Unless clearly shown otherwise, a zoning district boundary that follows a public right-of-way shall be deemed to follow the centerline of the public right-of-way.

4.2 - RESOURCE DISTRICTS

The purpose of resource lands is to conserve farm and forest land for current and future resource production. These districts do not automatically qualify for development or residential uses. Development on resource lands is generally restricted to uses that are supportive of resource uses.

COMMERCIAL FOREST USE CFU

§ 39.4050 PURPOSES

The purposes of the Commercial Forest Use District are to conserve and protect designated lands for continued commercial growing and harvesting of timber and the production of wood fiber and other forest uses; to conserve and protect watersheds, wildlife habitats and other forest associated uses; to protect scenic values; to provide for agricultural uses; to provide for recreational opportunities and other uses which are compatible with forest use; implement applicable Comprehensive Plan policies, and to minimize potential hazards or damage from fire, pollution, erosion or urban development.

One of the implementation tools to carry out the purposes of this District is a Lot of Record requirement to group into larger "Lots of Record" those contiguous parcels and lots that were in the same ownership on February 20, 1990. This requirement is in addition to all "tract" grouping requirements of State Statute and Rule.

§ 39.4055 AREA AFFECTED

MCC 39.4050 through 39.4155 shall apply to those lands designated CFU on the Multnomah County Zoning Map.

§ 39.4060 DEFINITIONS

Auxiliary - For the purposes of MCC 39.4070 (A) (2) to (3), the use or alteration of a structure or land which provides temporary help, or is directly associated with the conduct of a particular forest practice. An auxiliary structure shall be located on site, be temporary in nature, and be designed not to remain for the entire growth cycle of the forest from planting to harvesting. An auxiliary use shall be removed when the particular forest practice for which it was approved is concluded.

Commercial Tree Species - Trees recognized under rules adopted under ORS 527.715 (1996) for commercial production.

Contiguous - Refers to parcels or lots which have any common boundary, excepting a single point, and shall include, but not be limited to, parcels or lots separated only by an alley, street or other right-of-way.

Cubic Foot Per Acre - The average annual increase in cubic foot volume of wood fiber per acre for fully stocked stands at the culmination of mean annual increment as reported by the USDA Soil Conservation Service. Where SCS data are not available or are shown to be inaccurate, an alternative method for determining productivity may be used. An alternative method must provide equivalent data and be approved by the Department of Forestry.

Cubic Foot Per Tract Per Year - The average annual increase in cubic foot volume of wood fiber per tract for fully stocked stands at the culmination of mean annual increment as reported by the USDA Soil Conservation Service. Where SCS data are not available or are shown to be inaccurate, an alternative method for determining productivity may be used. An alternative method must provide equivalent data and be approved by the Department of Forestry.

Forest Operation - Any commercial activity relating to the growing or harvesting of any forest tree species as defined in ORS 527.620 (6) (1996).

Same Ownership - Refers to greater than possessory interests held by the same person or persons, spouse, minor age child, same partnership, corporation, trust or other entity, separately, in tenancy in common or by other form of title. Ownership shall be deemed to exist when a person or entity owns or controls ten percent or more of a lot or parcel, whether directly or through ownership or control or an entity having such ownership or control. For the purposes of this subsection, the seller of a property by sales contract shall be considered to not have possessory interest.

Tract - One or more contiguous Lots of Record in the same ownership. A tract shall not be considered to consist of less than the required acreage because it is crossed by a public road or waterway. Lots that are contiguous with a common boundary of only a single point are not a tract.

No building, structure or land shall be used and no development shall occur in this district except for the uses listed in MCC 39.4070 through 39.4080 when found to comply with MCC 39.4100 through 39.4155.

- (a) The planning department shall notify the county assessor of the above condition at the time the dwelling is approved;
 - (b) The property owner shall submit a stocking survey report to the county assessor and the assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules. 2. No lot (or parcel) that is part of the tract may be used to qualify another tract for the siting of a dwelling;

(b) The covenants, conditions and restrictions are irrevocable, unless a statement of release is signed by an authorized representative of Multnomah County. That release may be given if the tract is no longer subject to protection under Statewide Planning Goals for forest or agricultural lands;

(c) Enforcement of the covenants, conditions and restrictions shall be as specified in OAR 660-06-027 (December, 1995).

§ 39.4095 HERITAGE TRACT DWELLINGS STANDARDS

The county Road Official shall determine the necessary right-of-way widths based upon the county “Design and Construction Manual” and the Planning Director shall determine any additional setback requirements in consultation with the Road Official.

(D) Fire Safety Zones on the Subject Tract

(1) Primary Fire Safety Zone

(a) A primary fire safety zone is a fire break extending a minimum of 30 feet in all directions around a dwelling or structure. Trees within this safety zone shall be spaced with greater than 15 feet between the crowns. The trees shall also be pruned to remove low branches within 8 feet of the ground as the maturity of the tree and accepted silviculture practices may allow. All other vegetation should be kept less than 2 feet in height.

(b) On lands with existing or finished slopes of 10 percent or greater that are located within 30 feet of the ground coverage of a dwelling or structure the primary fire safety zone shall be extended farther down the slope from a dwelling or structure as follows:

Table 1.

Percent Slope	Distance In Feet
Less than 10	No additional required
Less than 20	50 additional
Less than 25	75 additional
Less than 40	100 additional

(c) The building site must have a slope less than 40 percent.

(2) Secondary Fire Safety Zone

A secondary fire safety zone is a fire break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of this safety zone is to reduce fuels so that the overall intensity of any wildfire is lessened. Vegetation should be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees should be removed to prevent the spread of fire up into the crowns of the larger trees. Assistance with planning forestry practices which meet these objectives may be obtained from the State of Oregon Department of Forestry or the local Rural Fire Protection District. The secondary fire safety zone required for any dwelling or structure may be reduced under the provisions of MCC 39.4155.

(3) No requirement in (1) or (2) above may restrict or contradict a forest management plan approved by the State of Oregon Department of Forestry pursuant to the State Forest Practice Rules; and

(4) Required Primary and Secondary Fire Safety Zones shall be established within the subject tract as required by Table 1 above.

(5) Required Primary and Secondary Fire Safety Zones shall be maintained by the property owner in compliance with the above criteria listed under (1) and (2).

§ 39.4115 DEVELOPMENT STANDARDS FOR DWELLINGS AND STRUCTURES

All dwellings and structures shall comply with the approval criteria in (B) through (D) below except as provided in (A). All exterior lighting shall comply with MCC 39.6850:

(A) For the uses listed in this subsection, the applicable development standards are limited as follows:

(1) Expansion of existing dwelling.

(a) Expansion of 400 square feet or less additional ground coverage to an existing dwelling: Not subject to development standards of MCC 39.4115;

(b) Expansion of more than 400 square feet additional ground coverage to an existing dwelling: Shall meet the development standards of MCC 39.4115(C);

(2) Replacement or restoration of a dwelling.

An operator may charge users of the property a fee that does not exceed the operator's cost to maintain the property, buildings and facilities. The site shall not include an aggregate surface or hard surface area unless the surface pre-existed the use approved under this paragraph. The following uses may be permitted when found by the approval authority to satisfy the applicable provisions in MCC 39.7000 to 39.7035 or the criteria listed for the use:

(A) Commercial activities that are in conjunction with a farm use, except for facilities for processing crops that meet the standards for crop source, building size, and other applicable siting standards pursuant to MCC 39.4225(L) above. Uses under this provision shall be subject to the approval criteria in MCC 36.6315(1) through (7).

1. No more than one-third or a maximum of 10 campsites, whichever is smaller, may include a yurt.
 2. The yurt shall be located on the ground or on a wood floor with no permanent foundation.
 3. As used in this subsection, "yurt" means a round, domed shelter of cloth or canvas on a collapsible frame with no plumbing, sewage disposal hook-up or internal cooking appliance.

(E) Community centers owned by a governmental agency or a nonprofit community organization and operated primarily by and for residents of the local rural community. The use shall meet the provisions in MCC 39.4235.

Such a facility may be approved for a one-year period which is renewable. These facilities are intended to be only portable or temporary in nature.

The primary processing of a forest product, as used in this section, means the use of a portable chipper or stud mill or other similar methods of initial treatment of a forest product in order to enable its shipment to market.

Forest products, as used in this section, means timber grown upon a parcel of land or contiguous land where the primary processing facility is located.

(H) Transmission towers over 200 feet in height, except as follows:

(1) Radio and television towers if found to satisfy the requirements of MCC 39.7550 through 39.7515; and

(K) Public road and highway projects subject to the approval criteria in MCC 39.7515(A) through (H) including:

(1) Reconstruction or modification of public roads and highways involving the removal or displacement of buildings but not resulting in the creation of new land parcels- and;

(2) Improvement of public road and highway related facilities, such as maintenance yards, weigh stations and rest areas, where additional property or right of way is required but not resulting in the creation of new land parcels.

(L) Notwithstanding the same ownership grouping requirements of the Lot of Record section, a single family heritage tract dwelling may be allowed on land identified as high-value farmland when:

(Note: MCC 39.7015 Conditional Use Approval Criteria does not apply)

(1) The lot or parcel meets the requirements of MCC 39.4265 (D) (1) through (8); and

(2) The lot or parcel cannot practicably be managed for farm use by itself or in conjunction with other land due to extraordinary circumstances inherent in the land or its physical setting that do not apply generally to other land in the vicinity. For the purposes of this section, this criterion asks whether the subject lot or parcel can be physically put to farm use without undue hardship or difficulty because of extraordinary circumstances inherent in the land or its physical setting. Neither size alone nor a parcel's limited economic potential demonstrate that a lot or parcel cannot be practicably managed for farm use. Examples of "extraordinary circumstances inherent in the land or its physical setting" include very steep slopes, deep ravines, rivers, streams, roads, railroad or utility lines or other similar natural or physical barriers that by themselves or in combination separate the subject lot or parcel from adjacent agricultural land and prevent it from being practicably managed for farm use by itself or together with adjacent or nearby farms. A lot or parcel that has been put to farm use despite the proximity of a natural barrier or since the placement of a physical barrier shall be presumed manageable for farm use; and

(3) The dwelling will not:

(a) Force a significant change in accepted farm or forest practices on surrounding lands devoted to farm or forest; or

(b) Significantly increase the cost of accepted farm or forest practices on surrounding lands devoted to farm or forest use; and

(4) The dwelling will not materially alter the stability of the overall land use pattern of the area.

(M) Notwithstanding the same ownership grouping requirements of the Lot of Record section, a single family heritage tract dwelling may be allowed on land identified as high-value farmland when:

(Note: MCC 39.7015 Conditional Use Approval Criteria does not apply)

(1) The lot or parcel meets the requirements of MCC 39.4235(D) (1) through (8); and

(2) The tract on which the dwelling will be sited is:

(a) Not composed predominately of irrigated or non-irrigated soils classified prime, unique, Class I or Class II; and

(b) Less than twenty-one acres in size; and

(c) Is bordered on at least 67% of its perimeter by tracts that are smaller than 21 acres, and at least two such tracts had dwellings on January 1, 1993; or

(d) Is not a flag lot and the tract is bordered on at least 25% of its perimeter by tracts that are smaller than 21 acres, and at least four dwellings existed on January 1, 1993, within one-quarter mile of the center of the subject tract. Up to two of the four dwellings may lie within an urban growth boundary, but only if the subject tract abuts an urban growth boundary, or

(e) The tract is a flag lot and is bordered on at least 25 percent of its perimeter by tracts that are smaller than 21 acres, and at least four dwellings existed on January 1, 1993, within one-quarter mile of the center of the subject tract and on the same side of the public road that provides access to the subject tract. For purposes of this section, the center of the subject tract is the geographic center of the flag lot if the applicant makes a written request for that interpretation and that interpretation does not cause the center to be located outside the flag lot. Up to two of the four dwellings may lie within an urban growth boundary, but only if the subject tract abuts an urban growth boundary. As used in this subsection:

1. "Flag lot" means a tract containing a narrow strip or panhandle of land providing access from the public road to the rest of the tract; and

2. "Geographic center of the flag lot" means the point of intersection of two perpendicular lines of which the first line crosses the midpoint of the longest side of a flag lot, at a 90-degree angle to the side, and the second line crosses the midpoint of the longest adjacent side of the flag lot.

(N) Construction of additional passing and travel lanes requiring the acquisition of right of way but not resulting in the creation of new land parcels.

(O) Park and ride lots.

(P) Realignment of roads, subject to the following limitations and the approval criteria in MCC 39.7015 and MCC 39.7020:

(1) “Realignment” means rebuilding an existing roadway on a new alignment where the new centerline shifts outside the existing right of way, and where the existing road surface is either removed, maintained as an access road or maintained as a connection between the realigned roadway and a road that intersects the original alignment.

(2) The realignment shall maintain the function of the existing road segment being realigned as specified in the acknowledged comprehensive plan.

(Q) New access roads and collectors where the function of the road is to reduce local access to or local traffic on a state highway, subject to the following limitations and the approval criteria in MCC 39.7015 and MCC 39.7020:

(1) The roads shall be limited to two travel lanes.

(2) Private access and intersections shall be limited to rural needs or to provide adequate emergency access.

(R) Transportation facilities, services and improvements that serve local travel needs, and which:

(1) Are not otherwise listed as a use in this EFU district or in OAR 660-012-0065 “Transportation Improvements on Rural Lands;” and

(2) Satisfy the approval criteria in MCC 39.7015 and MCC 39.7020:

(S) Rural schools as provided in this subsection. “Rural schools” means public or private schools for kindergarten through grade 12, including all buildings essential to the operation of a school, primarily for residents of the rural area in which the school is located. Establishment and expansion of rural schools shall meet the requirements for approval of Community Service Uses in MCC 39.7500 – 39.7525 in lieu of the Conditional Use

Provisions of MCC 39.7030 – 39.7035 and, if located within three miles of an urban growth boundary, the additional requirements set forth in MCC 39.4235.

(1) New rural schools may be established and existing rural schools may be expanded on land not identified as high-value farmland.

(2) Existing rural schools located on high-value farmland wholly within the EFU zone may be expanded on the same tract.

(T) Notwithstanding the authority in MCC 39.8300 – 39.8315 to expand a nonconforming use, but in addition and not in lieu of the authority therein to continue, alter, restore or replace a nonconforming use, schools located in an exclusive farm use zone that are no longer allowed under ORS 215.283 (1)(a), as in effect before January 1, 2010, but were established on or before January 1, 2009, and are not rural schools as defined in MCC 39.4230 (S) may be expanded only if:

(1) The expansion meets the requirements for approval of Community Service Uses in MCC 39.7500 – 39.7525 in lieu of the Conditional Use Provisions of MCC 39.7030 – 39.7035 and, if located within three miles of an urban growth boundary, the requirements set forth in MCC 39.4235;

(2) The expansion occurs on the tax lot on which the use was established prior to January 1, 2009, or a tax lot contiguous thereto that was owned by the applicant on January 1, 2009.

(V) A commercial photovoltaic solar power generation facility may be allowed when:

(1) All lots and parcels involved in the tract are Lots of Record pursuant to MCC 39.3070.

(2) A photovoltaic solar power generation facility shall not preclude more than 12 acres from use as a commercial agricultural enterprise.

For purposes of applying the acreage standards above, a photovoltaic solar power generation facility includes all existing and proposed facilities on a single tract, as well as any existing and proposed facilities determined to be under common ownership, on lands with less than 1320-feet of separation from the tract on which the new facility is proposed to be sited. Projects connected to the same parent company or individuals shall be considered to be in common ownership regardless of the operating business structure.

- (3) Will not force a significant change in accepted farm or forest practices or surrounding lands devoted to farm or forest use; and
- (4) Will not significantly increase the cost of accepted farm or forest practices on surrounding lands devoted to farm or forest use.
- (5) The proposed photovoltaic solar power generation facility will not create unnecessary negative impacts on agricultural operations conducted on any portion of the subject tract not occupied by project components.
- (6) The presence of a photovoltaic solar power generation facility will not result in unnecessary soil erosion or loss that could limit agricultural productivity on the subject property.
- (7) Construction or maintenance activities will not result in unnecessary soil compaction that reduces the productivity of soil for crop production.
- (8) Construction or maintenance activities will not result in the unabated introduction or spread of noxious weeds and other undesirable weeds species.
- (9) The project is not located on high-value farmland soils unless it can be demonstrated that:
- (a) Non high-value farmland soils are not available on the subject tract;
 - (b) Siting the project on non high-value farmland soils present on the subject tract would significantly reduce the projects ability to operate successfully; or
 - (c) The proposed site is better suited to allow continuation of an existing commercial farm or ranching operation on the subject tract than other possible sites also located on the subject tract, including those comprised of non high-value farmland soils; and
- (10) A study area consisting of lands zoned for exclusive farm use located within one mile measured from the center of the proposed project shall be established and:
- (a) If fewer than 48-acres of photovoltaic solar power generation facilities have been constructed or received land use approvals and obtained building permits within the study area no further action is necessary.

(b) When at least 48-acres of photovoltaic solar power generation have been constructed or received land use approvals and obtained building permits, either as a single project or as multiple facilities, within the study area the approval authority must find that the photovoltaic solar energy generation facility will not materially alter the stability of the overall land use pattern of the area. The stability of the land use pattern will be materially altered if the overall effect of existing and potential photo-voltaic solar energy generation facilities will make it more difficult for the existing farms and ranches in the area to continue operation due to diminished opportunities to expand, purchase or lease farmland, acquire water rights or diminish the number of tracts or acreage in farm use in a manner that will destabilize the overall character of the study area.

§ 39.4235 LIMITATIONS TO THE DESIGN CAPACITY OF STRUCTURES

(A) No enclosed structure with a design capacity greater than 100 people, or group of structures with a total design capacity of greater than 100 people, shall be approved in connection with the use within three miles of an urban growth boundary, unless an exception is approved pursuant to ORS 197.732 and OAR chapter 660, division 4, or unless the structure is described in a master plan adopted under the provisions of OAR chapter 660, division 34.

(B) Any enclosed structure or group of enclosed structures described in subsection (A) within a tract that existed on November 12, 2011 (effective date of Ord. 1186) must be separated from other enclosed structures by at least one-half mile.

(C) Existing facilities wholly within a farm use zone may be maintained, enhanced or expanded on the same tract, subject to other requirements of law, but enclosed existing structures within a farm use zone within three miles of an urban growth boundary may not be expanded beyond the requirements of this section.

§ 39.4240 SINGLE FAMILY DWELLINGS CONDITION OF APPROVAL - PROHIBITION ON CLAIMS ALLEGING INJURY FROM FARM OR FOREST PRACTICES

As a condition of approval of a single family dwelling, the landowner for the dwelling shall sign and record in the deed records for the county a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or

cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

§ 39.4245 DIMENSIONAL STANDARDS AND DEVELOPMENT REQUIREMENTS

(A) Except as provided in MCC 39.3070, the minimum lot size for new parcels shall be 80 acres in the EFU district.

(B) That portion of a street which would accrue to an adjacent lot if the street were vacated shall be included in calculating the size of such lot.

(C) Minimum Yard Dimensions – Feet

Front	Side	Street Side	Rear
30	10	30	30

Maximum Structure Height – 35 feet

Minimum Front Lot Line Length – 50 feet.

(D) The minimum yard requirement shall be increased where the yard abuts a street having insufficient right-of-way width to serve the area. The county Road Official shall determine the necessary right-of-way widths based upon the county “Design and Construction Manual” and the Planning Director shall determine any additional yard requirements in consultation with the Road Official.

(E) Structures such as barns, silos, windmills, antennae, chimneys or similar structures may exceed the height requirement if located at least 30 feet from any property line.

(F) In the West of Sandy River Rural Plan Area, on-site sewage disposal, storm water/drainage control, water systems unless these services are provided by public or community source, shall be provided on the lot.

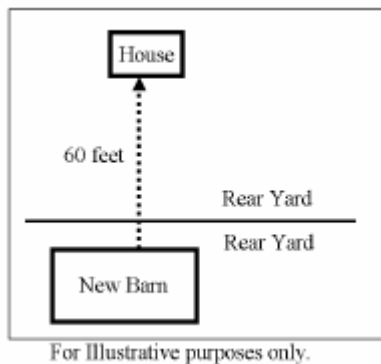

(1) Sewage and stormwater disposal systems for existing development may be off-site in easement areas reserved for that purpose.

(2) Stormwater/drainage control systems are required for new impervious surfaces. The system shall be adequate to ensure that the rate of runoff from the lot for the 10 year 24-hour storm event is no greater than that before the development.

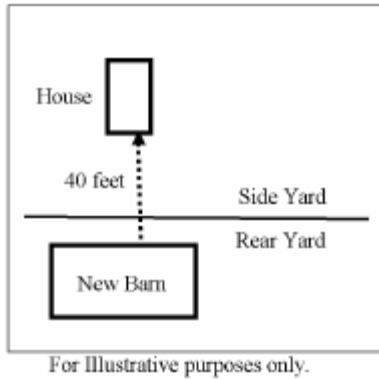

(G) Grading and erosion control measures sufficient to ensure that visible or measurable erosion does not leave the site shall be maintained during development. A grading and erosion control permit shall be obtained for development that is subject to MCC 39.6210 through 39.6235.

(H) Agricultural structures and equine facilities such as barns, stables, silos, farm equipment sheds, greenhouses or similar structures that do not exceed the maximum height requirement may have a reduced minimum rear yard of less than 30 feet, to a minimum of 10 feet, if:

(1) The structure is located at least 60 feet from any existing dwelling, other than the dwelling(s) on the same tract, where the rear property line is also the rear property line of the adjacent tract, or

(2) The structure is located at least 40 feet from any existing dwelling, other than the dwelling(s) on the same tract, where the rear property line is also the side property line of the adjacent tract.

(3) Placement of an agricultural related structure under these provisions in (F) do not change the minimum yard requirements for future dwellings on adjacent property.

(I) All exterior lighting shall comply with MCC 39.6850.

§ 39.4250 EXCEPTIONS TO LOT SIZE FOR SPECIFIC USES

(A) Lots less than the minimum lot size specified in MCC 39.4245 (A) may be created for uses listed in MCC 39.4220(V), MCC 39.4230(C) and (E) based upon:

- (1) The parcel for the nonfarm use is not larger than the minimum size necessary for the use;
- (2) The nature of the proposed use in relation to its impact on nearby properties; and
- (3) Consideration of the purposes of this district.

(B) Except as otherwise provided by MCC 39.3070, no sale or conveyance of any portion of a lot, for other than a public purpose, shall leave a structure on the remainder of the lot with less than the minimum lot or yard requirements or result in a lot with less than the area or width requirements of this district.

§ 39.4255 LOT LINE ADJUSTMENT; PROPERTY LINE ADJUSTMENT

(A) Pursuant to the applicable provisions in MCC 39.9300, an adjustment of the common lot line between contiguous Lots of Record may be authorized based on a finding that:

- (1) All dwellings that were situated on the same lot prior to the adjustments must remain together on the reconfigured lot; and

(2) The following dimensional and access requirements are met:

(a) The relocated common property line is in compliance with all minimum yard and minimum front lot line length requirements; and

(b) If the properties abut a street, the required access requirements of MCC 39.4260 are met after the relocation of the common property line; and

(D) **Heritage Tract Dwelling:** Notwithstanding the same ownership grouping requirements of the Lot of Record section, a single family heritage tract dwelling may be allowed on land not identified as high-value farmland when:

(1) The lot or parcel on which the dwelling will be sited meets the following requirements:

- (a) A deed or other instrument creating the lot or parcel was recorded with the Department of General Services, or was in recordable form prior to January 1, 1985; and

When a lot, parcel or tract is reconfigured pursuant to applicable law after November 4, 1993, the effect of which is to qualify a lot, parcel or tract for the siting of a dwelling, the date of the reconfiguration is the date of creation or existence. Reconfigured means any change in the boundary of the lot, parcel or tract.

The exception lands are typically smaller acreage lots that are rural residential in nature and often contain a single family dwelling. Though farming is generally suitable in these exception areas, the lots are typically too small to allow for farming as a primary income.

(2) The following uses, subject to the approval criteria in (4) below and provided that any servicing, processing or repair activities shall be within a sight-obscuring fence at least six feet in height:

- (a) Auction house or flea market;
- (b) Automobile, small truck or motorcycle, new and used sales or rental, repair, rebuilding, parts and glass replacement, body and fender work, painting, upholstery, towing and full service or self service car wash;

1. Driveways shall measure 25 to 30 feet in width at the property line with a curb radius of between 10 and 20 feet. Traffic lanes shall be stripped;
2. Access drives shall be 50 feet or more from the nearest curb return of a public street adjoining a corner lot;
3. Access drives on the same street frontage which serve the same lot shall be 150 feet for more apart on an arterial street; access drives shall be located on non-arterial street frontage, if any, unless the result would be that traffic from the proposed use would have to pass single-family residential units or land designated for low density residential use;
4. A 10 foot wide landscape buffer is required along a lot line adjacent to a residential district lot line and should contain:
 - a. Deciduous trees spaced between 20 to 30 feet apart depending on species, and a hedge which has a minimum height of 3 feet at the time of planting.

- b. No foliage or visual obstruction shall occur between 3 and 6 feet above grade within 10 feet of a streetside property line located within 10 feet of a driveway.
5. In the event the applicant's lot has a streetside lot line less than 50 feet in width, and there is an access drive on an adjoining non-residential lot improved according to the Multnomah County Design and Construction Manual, whose nearest point measured on the common right-of-way is not more than ten feet from the common property line. Then the applicant shall acquire an easement from the owner of the adjacent property for shared access or shall demonstrate that shared access is not possible. Shared access is not possible if the owner of the adjoining lot refuses, in writing, to grant a written request from the applicant for an easement for access purposes;
6. Where access is shared with an adjacent property along a common property line, an easement is required for the sharing of the driveway and the required landscaped buffer along that property line is eliminated.
- (b) Paved pedestrian walks shall connect to the public sidewalks(s) abutting the property. A sidewalk shall be constructed along any street lot line of the property, where none exists, as a committed part of the development. Pedestrian walks shall also be provided from building entrances to parking areas;

URBAN LOW DENSITY RESIDENTIAL DISTRICTS GENERAL PROVISIONS (LR-5, LR-7, LR-10)

§ 39.4780 PURPOSES

The purposes of the Urban Low Density Residential Districts are to provide for a choice of lower density housing locations and types, together with related and accessory uses; to assure adequate and safe access to residential uses; to assure lotting patterns and building areas which take maximum advantage of climatic conditions and means for efficient use of energy; to create and maintain long-term community stability; to assure that housing developments are consistent with the Comprehensive Plan.

§ 39.4781 ACCESS

All lots and parcels in this district shall abut a public street or shall have other access determined by the approval authority to be safe and convenient for pedestrians and for passenger and emergency vehicles. This access requirement does not apply to a pre-existing lot and parcel that constitutes a Lot of Record described in MCC 39.3140.

§ 39.4782 EXCEPTIONS TO DIMENSIONAL REQUIREMENTS

(A) When a lot has been included in a future street plan approved under MCC 39.9445 through 39.9465, development of that lot, including area and setback requirements, shall be in compliance with the street and lotting pattern of that future street plan, or approved revisions thereof, under MCC 39.9470.

(B) In acting to approve a land division under the Land Division Ordinance, the approval authority may grant an Exception not to exceed ten percent of the lot area or 25 percent of any other dimensional requirements upon findings that such Exception will result in any of the following:

- (1) More efficient use of the site;
- (2) A greater degree of privacy, safety or freedom from noise, fumes or glare;
- (3) An improved solar and climatic orientation;
- (4) The preservation of natural features, where appropriate; or
- (5) The provision of pedestrian circulation facilities where needed.

(C) Cornices, eaves, belt courses, sills, canopies, or similar architectural features may extend or project into a required yard not more than 30 inches. Fireplace chimneys may project into a required front, side or rear yard not more than two feet, provided the width of such side yard is not reduced to less than three feet.

(D) Open porches or balconies, not more than 30 inches in height and not covered by a roof or canopy, may extend or project into a required rear yard not more than four feet and such porches may extend into a required front yard not more than 30 inches.

(F) A fence, lattice work, screen, wall or similar feature with a maximum height of six feet may be located in any required yard provided, however, that the maximum height shall be four feet if the feature is within 15 feet of a front property line or five feet of a street side property line.

(G) Chimneys, antennae, or similar structures may exceed height maximums established by Ordinance if located at least 20 feet from any property line.

(H) A two-unit dwelling may be located with one unit on each of two adjoining lots. In such event, the minimum lot size and yard requirements shall apply to each unit, except that no yard shall be required between the units.

§ 39.4783 OFF-STREET PARKING AND LOADING

Off-street parking and loading shall be provided as required by MCC 39.6500 through 39.6600.

§ 39.4784 SIGNS

§ 39.4785 LOT SIZES FOR CONDITIONAL USES

Except as otherwise established by this Chapter, the lot size for a conditional use shall be determined by the approval authority at the time of approval if the use, based upon:

- (A) The site size needs of the proposed use;
- (B) The nature of the proposed use in relation to its impacts on nearby properties; and
- (C) Consideration of the purposes of the district.

§ 39.4786 RESIDENTIAL DEVELOPMENT IN UNSEWERED URBAN AREAS

(A) In the event the maximum number of lots or dwelling units allowable under the Comprehensive Plan, MCC 39.9000 through 39.9700 and the dimensional or other requirements of this district is not possible due to Department of Environmental Quality subsurface sewage disposal limitations, the site development plan shall designate the manner in which the additional allowable units may be located on the property when public sewer service is available.

(B) Review and action on a site development plan required by this subsection shall be taken under the applicable procedures of MCC 39.9000 through 39.9700 or the design review or other zoning approval provisions of this Chapter.

(C) Approval of a site development plan required by this subsection shall be supported by findings that:

(D) A decision by the Planning Director on a application under this subsection may be appealed by the applicant to the Hearings Officer in the manner provided in MCC 39.1160.

SOLAR ACCESS PROVISIONS FOR NEW DEVELOPMENT IN THE URBAN LOW DENSITY RESIDENTIAL DISTRICTS

§ 39.4790 PURPOSE

The purposes of the solar access provisions for new development in the Urban Low Density Residential districts are to ensure that land in the urban portions of Multnomah County is divided so that structures can be oriented to maximize solar access and to minimize shade on adjoining properties from structures and trees.

§ 39.4791 DESIGN STANDARD

At least 80 percent of the lots in a development subject to MCC 39.4700 through 39.4813 shall comply with one or more of the options in this Section.

(A) Basic Requirement (see MCC 39.4813 Figure 9). A lot complies with this Section if it:

- (1) Has a north-south dimension of 90 feet or more; and
- (2) Has a front lot line that is oriented within 30 degrees of a true east-west axis.

(B) Protected Solar Building Line Option (see MCC 39.4813 Figure 10). In the alternative, a lot complies with this Section if a solar building line is used to protect solar access as follows:

- (1) A protected solar building line for the lot to the north is designated on the plat, or documents recorded with the plat;
- (2) The protected solar building line for the lot to the north is oriented within 30 degrees of the true east-west axis;
- (3) There is at least 70 feet between the protected solar building line on the lot to the north and the middle of the north-south dimension of the lot to the south, measured along a line perpendicular to the protected solar building line;
- (4) There is at least 45 feet between the protected solar building line and the northern edge of the buildable area of the lot, or habitable structures are situated so that at least 80

percent of their south-facing wall will not be shaded by structures or non-exempt vegetation.

(C) Performance Option. In the alternative, a lot complies with this Section if:

(1) Habitable structures built on that lot will have their long axis oriented within 30 degrees of a true east-west axis and at least 80 percent of their ground floor south wall protected from shade by structures and non-exempt trees; or

(2) Habitable structures built on that lot will have at least 32 percent of their glazing and 500 square feet of their roof area which faces within 30 degrees of south and is protected from shade by structures and non-exempt trees.

§ 39.4792 EXEMPTIONS FROM DESIGN STANDARD

A development is exempt from MCC 39.4791 if the Planning Director finds the applicant has shown that one or more of the following conditions apply to the site. A development is partially exempt from MCC 39.4791 to the extent the Planning Director finds the applicant has shown that one or more of the following conditions apply to a corresponding portion of the site. If a partial exemption is granted for a given development, the remainder of the development shall comply with MCC 39.4791.

(A) Slopes - The site, or a portion of the site for which the exemption is sought, is sloped 20 percent or more in a direction greater than 45 degrees east or west of true south, based on a topographic survey by a licensed professional land surveyor.

(B) Off-Site Shade - The site, or a portion of the site for which the exemption is sought, is within the shadow pattern of off-site features, such as but not limited to structures, topography, or non-exempt vegetation, which will remain after development occurs on the site from which the shade is originating.

(1) Shade from an existing or approved off-site dwelling in a single family residential zone and from topographic features is assumed to remain after development of the site.

(2) Shade from an off-site structure in a zone other than a single family residential zone is assumed to be the shadow pattern of the existing or approved development thereon or the shadow pattern that would result from the largest structure allowed at the closest setback on adjoining land, whether or not that structure now exists.

(3) Shade from off-site vegetation is assumed to remain after development of the site if: the trees that cause it are situated in a required setback; or they are part of a developed area, public park, or legally reserved open space; or they are in or separated from the developable remainder of a parcel by an undevelopable area or feature; or they are part of landscaping required pursuant to local law.

(4) Shade from other off-site sources is assumed to be shade that exists or that will be cast by development for which applicable local permits have been approved on the date a complete application for the development is filed.

(C) On-Site Shade - The site, or a portion of the site for which the exemption is requested, is:

(1) Within the shadow pattern of on-site features such as, but not limited to structures and topography which will remain after the development occurs; or

(2) Contains non-exempt trees at least 30 feet tall and more than 6 inches in diameter measured 4 feet above the ground which have a crown cover over at least 80 percent of the site or relevant portion. The applicant can show such crown cover exists using a scaled survey or an aerial photograph. If granted, the exemption shall be approved subject to the condition that the applicant preserve at least 50 percent of the trees that cause the shade that warrants the exemption. The applicant shall file a note on the plat or other document in the office of the County Recorder binding the applicant to comply with this requirement.

The county shall be made a party of any covenant or restriction created to enforce any provision of MCC 39.4790 through 39.4813. The covenant or restriction shall not be amended without written county approval.

§ 39.4793 ADJUSTMENTS TO DESIGN STANDARD

The Planning Director shall reduce the percentage of lots that must comply with MCC 39.4791 to the minimum extent necessary if it finds the applicant has shown one or more of the following site characteristics apply.

(A) Density and Cost - If the design standard in MCC 39.4791 is applied, either the resulting density is less than that proposed, or on-site site development costs (e.g. grading, water, storm drainage and sanitary systems, and roads) and solar related off-site site

development costs are at least 5 percent more per lot than if the standard is not applied. The following conditions, among others, could constrain the design of a development in such a way that compliance with MCC 39.4791 would reduce density or increase per lot costs in this manner. The applicant shall show which if any of these or other similar site characteristics apply in an application for a development.

(1) The portion of the site for which the adjustment is sought has a natural grade that is sloped 10 percent or more and is oriented greater than 45 degrees east or west of true south based on a topographic survey of the site by a professional land surveyor.

(2) There is a significant natural feature on the site, identified as such in the comprehensive plan or zoning code that prevents given streets or lots from being oriented for solar access, and it will exist after the site is developed.

(3) Existing road patterns must be continued through the site or must terminate on-site to comply with applicable road standards or public road plans in a way that prevents given streets or lots in the development from being oriented for solar access.

(4) An existing public easement or right-of-way prevents given streets or lots in the development from being oriented for solar access.

(B) Development Amenities – If the design standard in MCC 39.4791 applies to a given lot or lots, significant development amenities that would otherwise benefit the lot(s) will be lost or impaired. Evidence that a significant diminution in the market value of the lot(s) would result from having the lot(s) comply with MCC 39.4791 is relevant to whether a significant development amenity is lost or impaired. Development amenities which may merit design adjustments include, but are not limited to the following:

(1) Views of volcanic peaks in the Cascade Range;

(2) Substantial open space, recreation or aesthetic features added by the applicant;

(3) Existing Goal 5 Features identified in the Comprehensive Plan.

(C) Existing Shade – Non-exempt trees at least 30 feet tall and more than 6 inches in diameter measured 4 feet above the ground have a crown cover over at least 80 per cent of the lot and at least 50 percent of the crown cover will remain after development of the lot.

The applicant can show such crown cover exists using a scaled survey of non-exempt trees on the site or using an aerial photograph.

(1) Shade from non-exempt trees is assumed to remain if: the trees are situated in a required setback; or they are part of an existing or proposed park, open space, or recreational amenity; or they are separated from the developable remainder of their parcel by an undevelopable area or feature; or they are part of landscaping required pursuant to local law; and they do not need to be removed for a driveway or other development.

(2) Also, to the extent the shade is caused by on-site trees or off-site trees on land owned by the applicant, it is assumed to remain if the applicant files in the office of the County Recorder a covenant binding the applicant to retain the trees causing the shade on the affected lots.

§ 39.4794 PROTECTION FROM FUTURE SHADE

Structures and non-exempt vegetation must comply with the Solar Balance Point sections for existing lots (reference MCC 39.4799 through 39.4806) if located on a lot that is subject to the solar design standard in MCC 39.4791, or if located on a lot south of and adjoining a lot that complies with MCC 39.4791.

The applicant shall file a note on the plat or other documents in the office of the County Recorder binding the applicant and subsequent purchasers to comply with the future shade protection standards in MCC 39.4794. The county shall be made a party of any covenant or restriction created to enforce any provision of MCC 39.4790 through 39.4813. The covenant or restriction shall not be amended without written county approval.

§ 39.4795 APPLICATION

An application for approval of a development subject to MCC 39.4790 through 39.4813 shall include:

(A) Maps and text sufficient to show the development complies with the solar design standard of MCC 39.4791, except for lots for which an exemption or adjustment from MCC 39.4791 is requested, including at least:

(1) The north-south lot dimension and front lot line orientation of each proposed lot.

(2) Protected solar building lines and relevant building site restrictions, if applicable.

(3) For the purpose of identifying trees exempt from MCC 39.4794, a map showing existing trees at least 30 feet tall and over 6 inches in diameter at a point 4 feet above grade, indicating their height, diameter and species, and stating that they are to be retained and are exempt.

(4) Copies of all private restrictions relating to solar access.

(B) If an exemption or adjustment to MCC 39.4791 is requested, maps and text sufficient to show that given lots or areas in the development comply with the standards for such an exemption or adjustment in MCC 39.4792, or 39.4793 respectively.

§ 39.4796 PROCEDURE

Development requests subject to Solar Access Provisions in the preceding sections (MCC 39.4790 through 39.4795) shall be decided as prescribed by MCC 39.9000 through 39.9700.

§ 39.4798 SOLAR BALANCE POINT PROVISIONS

The purposes of these provisions are to promote the use of solar energy, to minimize shading of structures by structures and accessory structures, and, where applicable, to minimize shading of structures by trees. Decisions related to these provisions are intended to be ministerial.

§ 39.4799 APPLICABILITY

MCC 39.4790 through 39.4813 applies to an application for a building permit for all structures in LR-10, LR-7, and LR-5 zones, and all single family detached structures in any urban zone, except to the extent the approval authority finds the applicant has shown that one or more of the conditions listed in MCC 39.4802 or 39.4803 exists, and exemptions or adjustments provided therein are warranted. In addition, non exempt vegetation planted on lots subject to the provisions of MCC 39.4794 of the Solar Access Provisions for New Development shall comply with the shade point height standards as provided in MCC 39.4801 and 39.4802.

§ 39.4800 SOLAR SITE PLAN REQUIRED

An applicant for a building permit for a structure subject to MCC 39.4790 through 39.4813 shall submit a site plan that shows the maximum shade point height allowed under MCC 39.4801 and the allowed shade on the proposed structure's solar features as provided in 39.4804. If applicable, the site plan shall also show the solar balance point for the structure as provided in MCC 39.4805.

§ 39.4801 MAXIMUM SHADE POINT HEIGHT STANDARD

The height of the shade point shall comply with either subsection A or B below.

(A) Basic Requirement. The height of the shade point shall be less than or equal to the height specified in Table A or computed using the following formula. If necessary, interpolate between the 5 foot dimensions listed in Table A.

$$H = [(2 \times \text{SRL}) - N + 150] / 5$$

Where: H = the maximum allowed height of the shade point (see Figures 4 and 5);

SRL = shade reduction line [the distance between the shade point and the northern lot line (see Figure 6); and

N = the north-south lot dimension, provided that a north-south lot dimension more than 90 feet shall use a value of 90 feet for this section.

Provided, the maximum allowed height of the shade point may be increased one foot above the amount calculated using the formula or Table A for each foot that the average grade at the rear property line exceeds the average grade at the front property line.

(B) Performance Option - The proposed structure, or applicable nonexempt vegetation, will shade not more than 20 percent of the south-facing glazing of existing habitable structure(s), or, where applicable, the proposed structure or non-exempt vegetation comply with MCC 39.4791(B) or (C) the Solar Access Provisions for New Development. If MCC 39.4791 (B), Protected Solar Building Line Option, is used, non-exempt trees and the shade point of structures shall be set back from the protected solar building line 2.5 feet for every 1 foot of height of the structure or of the mature height of non-exempt vegetation over 2 feet.

§ 39.4802 EXEMPTION FROM THE MAXIMUM SHADE POINT HEIGHT STANDARD

The Planning Director shall exempt a proposed structure or nonexempt vegetation from MCC 39.4800 and 39.4801 if the applicant shows that one or more of the conditions in this Section exist, based on plot plans or plats, corner elevations or other topographical data, shadow patterns, suncharts or photographs, or other substantial evidence submitted by the applicant.

(A) Exempt Lot - When created the lot was subject to the Solar Access Provisions for New Development and was not subject to the provisions of MCC 39.4794.

(B) Pre-Existing Shade - The structure or applicable non-exempt vegetation will shade an area that is shaded by one or more of the following:

- (1) An existing or approved building or structure;
- (2) A topographic feature;
- (3) A non-exempt tree that will remain after development of the site. It is assumed a tree will remain after development if it: is situated in a building setback required by local law;

is part of a developed area or landscaping required by local law; is within a public park, or landscape strip, or legally reserved open space; is in or separated from the developable remainder of a parcel by an undevelopable area or feature; or is on the applicant's property and not affected by the development. A duly executed covenant also can be used to preserve trees causing such shade.

(C) Slope - The site has an average slope that exceeds 20 percent in a direction greater than 45 degrees east or west of true south based on a topographic survey by a licensed professional land surveyor.

(D) Insignificant Benefit - The proposed structure or nonexempt vegetation shades one or more of the following:

- (1) An undevelopable area;
- (2) The wall of an unheated space, such as a typical garage;
- (3) Less than 20 square feet of south-facing glazing.

(E) Public Improvement - The proposed structure is a publicly owned improvement.

§ 39.4803 ADJUSTMENTS TO THE MAXIMUM SHADE POINT HEIGHT STANDARD

The Planning Director shall increase the maximum permitted height of the shade point determined using MCC 39.4801 to the extent it finds the applicant has shown one or more of the following conditions exist, based on plot plans or plats, corner elevations or both topographical data, shadow patterns, suncharts or photographs, or other substantial evidence submitted by the applicant.

(A) Physical Conditions - Physical conditions preclude development of the site in a manner that complies with MCC 39.4801, due to such things as a lot size less than 3000 square feet, unstable or wet soils, or a drainage way, public or private easement, or right-of-way.

(B) Conflict between the Maximum Shade Point Height and Allowed Shade on the Solar Feature Standards - A proposed structure may be sited to meet the solar balance point standard described in MCC 39.4805 or be sited as near to the solar balance point as allowed by MCC 39.4805, if:

(1) When the proposed structure is sited to meet the maximum shade point height standard determined using MCC 39.4801, its solar feature will potentially be shaded as determined using MCC 39.4804; and

(2) The application includes a form provided by the county that:

(a) Releases the applicant from complying with MCC 39.4801 and agrees that the proposed structure may shade an area otherwise protected by MCC 39.4801;

(b) Releases the county from liability for damages resulting from the adjustment;

(c) Is signed by the owner(s) of the properties that would be shaded by the proposed structure more than allowed by the provisions of MCC 39.4801.

(3) Before the county issues a permit for a proposed structure for which an adjustment has been granted pursuant to MCC 39.4803(B), the applicant shall file the form provided for in Subsection (B)2 above in the office of the County Recorder with the deeds to the affected properties.

§ 39.4804 ANALYSIS OF ALLOWED SHADE ON SOLAR FEATURE

(A) The applicant is exempt from MCC 39.4804 if the lot(s) south of and adjoining the applicant's property is exempt from MCC 39.4801.

(B) Applicants shall be encouraged to design and site a proposed habitable structure so that the lowest height of the solar feature(s) will not be shaded by buildings or nonexempt trees on lot(s) to the south. The applicant shall complete the following calculation procedure to determine if the solar feature(s) of the proposed structure will be shaded. To start, the applicant shall choose which of the following sources of shade originating from adjacent lot(s) to the south to use to calculate the maximum shade height at the north property line:

(1) Existing structure(s) or non-exempt trees; or

(2) The maximum shade that can be cast from future buildings or non-exempt trees, based on Table C. If the lot(s) to the south can be further divided, then the north-south dimension shall be assumed to be the minimum lot width required for a new lot in that zone.

(C) The height of the lowest point of any solar feature of the proposed structure shall be calculated with respect to either the average elevation or the elevation at the midpoint of the front lot line of the lot to the south.

(D) The applicant shall determine the height of the shadow that may be cast upon the applicant's solar feature by the source of shade selected in Subsection (B) by using the following formula or Table B.

$$\text{SFSH} = \text{SH} (\text{SGL}/2.5)$$

Where:

SFSH = the allowed shadow height on the solar feature (see MCC 39.4813 Figure 8).

SH = the height of the shade at the northern lot line of lot(s) to the south as determined in Section Table C.

SGL = the solar gain line (the distance from the solar feature to the northern lot line of adjacent lot(s) to the south, see MCC 39.4813 Figure 7).

Table B. Maximum Permitted Height of Shadow at Solar Feature (In Feet)

(E) If the allowed shade height on the solar feature calculated in Subsection (D) is higher than the lowest height of the solar feature calculated in Subsection (C) the applicant shall be encouraged to consider any changes to the house design or location which would make it practical to locate the solar feature so that it will not be shaded in the future.

§ 39.4805 SOLAR BALANCE POINT

If a structure does not comply with the maximum shade point height standard in MCC 39.4801 and the allowed shade on a solar feature standard in MCC 39.4804, then the solar balance point of the lot shall be calculated (see MCC 39.4813 Figure 8). The solar balance point is the point on the lot where a structure would most nearly comply with both of these standards, (i.e. the variation from both standards is minimized.).

§ 39.4806 YARD SETBACK ADJUSTMENT

The county shall grant an adjustment to the side, and/or rear yard setback requirement(s) by up to 50 percent and up to 25 percent to a front yard setback, if necessary to build a proposed structure so it complies with either the shade point height standard in MCC 39.4801, the allowed shade on a solar feature standard in MCC 39.4804, or the solar balance point standard in MCC 39.4805 as provided herein (see MCC 39.4813 Figure 8). This adjustment is not intended to encourage reductions in available solar access or unnecessary modification of setback requirements, and shall apply only if necessary for a structure to comply with the applicable provisions of MCC 39.4790 through 39.4813. (The following list illustrates yard adjustments permitted under this section:)

(A) LR-5 Zone(s):

- (1) A front yard setback may be reduced to not less than (15) feet.
- (2) A rear yard setback may be reduced to not less than (7.5) feet.
- (3) A side yard setback may be reduced to not less than (3) feet.

(B) LR-7 Zone(s):

(1) A front yard setback may be reduced to not less than (15) feet.

(2) A rear yard setback may be reduced to not less than (7.5) feet.

(3) A side yard setback may be reduced to not less than (3) feet.

§ 39.4807 REVIEW PROCESS

A Planning Director determination on a Building Permit request subject to the preceding Solar Balance Point Provisions (MCC 39.4798 through 39.4806) may be appealed as provided by MCC 39.1160.

§ 39.4808 SOLAR ACCESS PERMIT PROVISIONS

The purpose of MCC 39.4809 through 39.4812 is to protect solar access features on lots designated or used for a single family detached dwelling under some circumstances. It authorizes owners of such lots to apply for a permit that, if granted, prohibits solar features from being shaded by certain future vegetation on and off the permittee's site.

§ 39.4809 APPLICABILITY

An owner or contract purchaser of property may apply for and/or be subject to a solar access permit for a solar feature if that property is in a LR-10, LR-7 or LR-5, zone, or is or will be developed with a single family dwelling in any urban zone. The county's decision whether or not to grant a solar access permit is intended to be ministerial.

§ 39.4810 APPROVAL STANDARDS FOR A SOLAR ACCESS PERMIT

The Planning Director shall approve an application for a solar access permit if the applicant shows:

(A) The application is complete;

(B) The Information it contains is accurate; and

(C) Non-exempt vegetation on the applicant's property does not shade the solar feature.

§ 39.4811 DUTIES CREATED BY SOLAR ACCESS PERMIT

(A) A party to whom the county grants a solar access permit shall:

(1) Record the permit, legal descriptions of the properties affected by the permit, the solar access height limit, and the site plan required in MCC 39.4812(C) with such modifications as required by the County Recorder, with the deeds to the properties affected by it, indexed by the names of the owners of the affected properties, and pay the fees for such filing;

(2) Install the solar feature in a timely manner; and

(3) Maintain non-exempt vegetation on the site so it does not shade the solar feature.

(B) An owner of property burdened by a solar access permit shall be responsible and pay all costs for keeping nonexempt vegetation from exceeding the solar access height limit. However, vegetation identified as exempt on the site plan required in MCC 39.4812(C) (e.g., vegetation an owner shows was in the ground on the date an application for a solar access permit is filed, and solar friendly vegetation) are exempt from the solar access permit.

§ 39.4812 APPLICATION CONTENTS

An application for a solar access permit shall contain the following information:

(A) A legal description of the applicant's lot and a legal description, owners' names, and owners' addresses for lots all or a portion of which are within 150 feet of the applicant's lot and 54 degrees east and west of true south measured from the east and west corners of the applicant's south lot line. The records of the County Tax Assessor shall be used to determine who owns property for purposes of an application. The failure of a property owner to receive notice shall not invalidate the action if a good faith attempt was made to notify all persons who may be affected.

(B) A scaled plan of the applicant's property showing:

(1) Vegetation in the ground as of the date of the application if, when mature, that vegetation could shade the solar feature.

(2) The approximate height above grade of the solar feature, its location, and its orientation relative to true south.

(C) A scaled plan of the properties on the list required in Subsection (A) above showing:

(1) Their approximate dimensions; and

(2) The approximate location of all existing vegetation on each property that could shade the solar feature(s) on the applicant's property.

(D) For each affected lot, the requested solar access height limit. The solar access height limit is a series of contour lines establishing the maximum permitted height for non-exempt vegetation on lots affected by a Solar Access Permit (see MCC 39.4813 Figure 11). The contour lines begin at the bottom edge of a solar feature for which a permit is requested and rise in five foot increments at an angle to the south not less than 21.3 degrees from the horizon and extend not more than 54 degrees east and west of true south. Notwithstanding the preceding, the solar access height limit at the northern lot line of any lot burdened by a solar access permit shall allow non-exempt vegetation on that lot whose height causes not more shade on the benefitted property than could be caused by a structure that complies with the Solar Balance Point Provisions for existing lots.

(E) The appropriate fee.

(F) If available, a statement signed by the owner(s) of some or all of the property(ies) to which the permit will apply if granted verifying that the vegetation shown on the plan submitted pursuant to subsection(C) above accurately represents vegetation in the ground on the date of the application. The county shall provide a form for that purpose. The signed statements provided for herein are permitted but not required for a complete application.

§ 39.4813 DEFINITIONS

The following definitions shall apply to MCC 39.4790 through 39.4812.

Crown Cover - The area within the drip line or perimeter of the foliage of a tree.

Development - Any short plat, partition, subdivision or planned unit development that is created under the county's land division or zoning regulations.

Exempt Tree or Vegetation - The full height and breadth of vegetation that the Planning Director has identified as solar friendly and listed in the Solar Friendly Tree Report, 1987; and any vegetation listed on a plat map, a document recorded with the plat, or a solar access permit as exempt.

Front Lot Line - For purposes of the solar access regulations, a lot line abutting a street. For corner lots the front lot line is that with the narrowest frontage. When the lot line abutting a street is curved, the front lot line is the chord or straight line connecting the ends of the curve. For a flag lot, the front lot line is the lot line that is most parallel to and closest to the street, excluding the pole portion of the flag lot (see Figure 1).

Non-Exempt Tree or Vegetation.- Vegetation that is not exempt.

Northern Lot Line - The lot line that is the smallest angle from a line drawn east-west and intersecting the northernmost point of the lot, excluding the pole portion of a flag lot. If the north line adjoins an undevelopable area other than a required yard area, the northern lot line shall be at the north edge of the undevelopable area. If two lot lines have an identical angle relative to a line drawn east-west, then the northern lot line shall be a line 10 feet in length within the lot parallel with and at a maximum distance from the front lot line (see Figure 2).

North-South Dimension - The length of a line beginning at the mid-point of the northern lot line and extending in a southerly direction perpendicular to the northern lot line until it reaches a property boundary (see Figure 3).

Protected Solar Building Line - A line on a plat or map recorded with the plat that identifies the location on a lot where a point two feet above may not be shaded by structures or non-exempt trees (see Figure 10).

Shade - A shadow cast by the shade point of a structure or vegetation when the sun is at an altitude of 21.3 degrees and an azimuth ranging from 22.7 degrees east and west of true south.

Shade Point - The part of a structure or non-exempt tree that casts the longest shadow onto the adjacent northern lot(s) when the sun is at an altitude of 21.3 degrees and an azimuth ranging from 22.7 degrees east and west of true south; except a shadow caused by a narrow object such as a mast or whip antenna, a dish antenna with a diameter of 3 feet or less, a chimney, utility pole or wire. The height of the shade point shall be measured from the the shade point to either the average elevation at the front lot line or the elevation at the midpoint of the front lot line. If the shade point is located at the north end of a ridgeline of a structure oriented within 45 degrees of a true north-south line, the shade point height computed according to the preceding sentence may be reduced by 3 feet. If a structure has

a roof oriented within 45 degrees of a true east-west line with a pitch that is flatter than 5 feet (vertical) in 12 feet (horizontal) the shade point height will be the eave of the roof. If such a roof has a pitch that is 5 feet in 12 feet or steeper, the shade point will be the peak of the roof (see Figures 4 and 5).

Shade Reduction Line - A line drawn parallel to the northern lot line that intersects the shade point (see Figure 6).

Shadow Pattern - A graphic representation of an area that would be shaded by the shade point of a structure or vegetation when the sun is at an altitude of 21.3 degrees and an azimuth ranging between 22.7 degrees east and west of true south (see Figure 12).

Solar Access Height Limit - A series of contour lines establishing the maximum permitted height for non-exempt vegetation on lots affected by a Solar Access Permit (see Figure 11).

Solar Access Permit - A document issued by the county that describes the maximum height that non-exempt vegetation is allowed to grow on lots to which a solar access permit applies.

Solar Feature - A device or combination of devices or elements that does or will use direct sunlight as a source of energy for such purposes as heating or cooling of a structure, heating or pumping of water, and generating electricity. Examples of a solar feature include a window that contains at least 20 square feet of glazing oriented within 45 degrees east and west of true south, a solar greenhouse, or a solar hot water heater. A solar feature may be used for purposes in addition to collecting solar energy, including but not limited to serving as a structural member or part of a roof, wall, or window. A south-facing wall without windows and without other features that use or collect solar energy is not a solar feature for purposes of MCC 39.4790 through 39.4812.

Solar Gain Line - A line parallel to the northern property line(s) of the lot(s) south of and adjoining a given lot including lots separated only by a street, that intersects the solar feature on that lot (see Figure 7).

South or South Facing - True south, or 20 degrees east of magnetic south.

Sun Chart - One or more photographs that plot the position of the sun between 10:30 a.m. and 1:30 p.m. on January 21, prepared pursuant to guidelines issued by the Planning Director. The sunchart shall show the southern skyline through a transparent grid on

which is imposed solar altitude for a 45-degree and 30 minute northern latitude in 10-degree increments and solar azimuth from true south in 15-degree increments.

Undeveloped Area - An area that cannot be used practicably for a habitable structure because of natural conditions, such as slopes exceeding 20 percent in a direction greater than 45 degrees east or west of true south, severe topographic relief, water bodies, or conditions that isolate one portion of a property from another portion so that access is not practicable to the unbuildable portion; or human-made conditions, such as existing development which isolates a portion of the site and prevents its further development; setbacks or development restrictions that prohibit development of a given area of a lot by law or private agreement; or existence or absence of easements or access rights that prevent development of a given area.
