Testimony:

Hello, my family are avid mountain bikers and enjoy the wonderful opportunities available to us in Oregon to explore the great outdoors. Mountain biking allows us to educate our children on the values of hard work, exercise, exploring our environment, and the many wonderful opportunities for entertainment that don't involve a computer screen.

We feel strongly that more trails that are available to individuals and families will create greater opportunities to explore our beautiful environment, instill values of stewardship for the environment, and help support the economies of areas surrounding these trails. A family bike ride turns into an opportunity to share time together, have lunch at a local restaurant and support small businesses.

Thank you again for your support of creating more local trails!
