Testimony:

Please approve the North Tualatin Mountains Access Master Plan. My family loves to mountain bike for fun, exercise and to get out and about in nature. This trail will be much closer to home so we won't have to drive so far and it will allow others who might not have the opportunity to travel to a trail further away to participate. It is well planned, using science to protect streams, prevent erosion, and allow for animals to cross, and community input has been used to develop it.

Thank you,

Gayle Rodabaugh
