Multnomah County Program #78314 - IT End	terprise and Web Application	n Services		2/20/2019
Department:	County Assets	Program Contact:	Chris Clancy	
Program Offer Type:	Internal Service	Program Offer Stage:	As Requested	
Related Programs:				
Program Characteristic	s: In Target			

Executive Summary

Enterprise Web Services provides reliable services used across departmental boundaries, serving all County lines of business. These services include Google Apps for Government, public websites (i.e. multco.us, multcopets.org and multcolib.org) and internal websites like commons.multco.us. In total, this program supports over 30 applications used internally and by the public.

Program Summary

Enterprise and Web Application Services include managing customer relationships; capturing and prioritizing IT service requests; understanding and defining business needs; designing, building, implementing, and maintaining innovative software and reporting systems; managing vendor systems and relationships; maintaining and enhancing legacy systems.

Enterprise Web Services provide the standard platforms for applications that enable access via the internet/intranet to County program information, citizen self-serve/direct access to County services, and electronic transaction processing.

Enterprise Web Services include web platform support and maintenance, Google Apps for Government administration and integration support, and support for specific web systems including the public website, the Multnomah County Library's public site, and the County's intranet (Multco Commons). A focus has been made on using open source tools (i.e. Drupal) and innovative hosting solutions on Amazon Web Services to save on costs to the County.

All services include understanding and defining enterprise business needs, recommending effective and innovative technology solutions, constructing and upgrading platforms as required, and ensuring the integrity and security of the platforms.

Key to effectively providing these services is meeting common, cross department needs and identifying new opportunities, while at the same time standardizing services and platforms in order to provide a low total cost of ownership.

Performance Measures							
Primary Measure	FY18 Actual	FY19 Purchased	FY19 Estimate	FY20 Offer			
Percent of employee hours spent on customer work versus IT and administrative work	27%	27%	27%	27%			
Percent of time production systems are available for customer usage (excluding planned outages)	99%	99%	99%	99%
