Testimony: It's encouraging to see local government working to create properly constructed trails that can be used by mountain bikers. Not only will this serve a broad population of active residents, it will engage them in helping to maintain our outdoor spaces. Users are always more likely to become stewards. Lastly, since the plan is to build these trails professionally that means they will have the least impact possible on the wilderness and will last far longer for everyone to enjoy. Thanks for improving quality of life in our region.
