Testimony:

Hi,

It's important to provide opportunities for individuals and families to enjoy nature while also protecting it. When people have meaningful experiences with nature, they are more likely to care about it.

My family and I enjoy off-road cycling because it allows us to get exercise, be close to nature, and feel safer because we are away from cars. We enjoy riding at Post Canyon, Sandy Ridge, and Stub Stewart. We would love to have more options for off-road cycling that require less time driving.

Thank you!
