For example, the first contradiction that jumps out at me when looking closely at the approval criteria (of development within an overlay zone of SEC-h) is: (B) Development standards: (1) Where a parcel contains any non-forested "cleared" areas, development shall only occur in these areas, except as necessary to provide access and to meet minimum clearance standards for fire safety. It seems to me, if I understand this statement correctly, that development within protected wildlife habitat is simply not allowed."
