Executive Summary

The Medical Records Program is responsible for the internal management of all of the Behavioral Health Division's (BHD) clinical records required by Oregon Revised Statutes, Oregon Administrative Rules and Coordinated Care Organizations.

Program Summary

The Behavioral Health Division's Medical Records Unit ensures that mental health, care coordination, protective services and alcohol and drug medical records are maintained in compliance with federal and state laws and regulations, and county and departmental rules, policies and procedures.

Program staff provide multiple record services including: document indexing; quality assurance; billing and administrative rule compliance auditing; data entry for reporting; archiving and retrieval; forms design and management; authorization/ release of information; legal requests for records; notary services; and health information management expertise.

As the Local Mental Health Authority, BHD is also responsible for programs such as involuntary commitment, commitment monitoring, trial visit and residential services which require maintenance of an individual's medical records. BHD direct service programs are expected to serve more than 27,000 individuals, each requiring a medical record.

In response to COVID, Medical Records, QM and IT implemented the use of electronic signatures for our Consent for Services, Email Permission, Text Permission and Release of Information forms this year. The Division is using the Google Suite with add-ons to accomplish this at no additional cost. All forms and process documents were translated to the top 7 languages used by Multhomah County clients. The translation of documents will ensure the same access and customer experience for all clients.

¹ Health Information Techs audit representative sample sizes of all records each month to evaluate presence of required documentation for Medicaid Billing. Percent lower than 100% means inadequate compliance with BHD audit plans. ²The methodology for counting scanned documents has changed to more accurately reflect the workload. This is detailed in the significant changes section of the Program Offer.

Significant Program Changes

Last Year this program was: FY 2021: 40067 Medical Records for Behavioral Health Division

In previous years, the data for this program offer was gathered by a report in Evolv that pulled rows of scanned documents and multiplied that number by 10 to indicate the average number of images for a scanned document. This method would have inaccurately reported the actual number for this year to be 170,720. To accurately reflect the workload, the team now tracks the number of documents they upload daily and 55,624 is a true representation. The team has clear methods for determining what constitutes a "document" for uploading. The previous method has been discontinued.
