## Portland, OR

Gun homicide rate in 2020

**7 per 100k**

0.5x the 100 cities rate

## Gun homicides per 100k population

Through February 2021

# Gun Violence 20/20 City Tracker

Please select a city:

Portland, OR

*Gun Violence 20/20* uses data from the *Gun Violence Archive*, collected from news media and other public sources. Although these data are not from official sources, GVA data (particularly for gun homicides) are highly correlated with official statistics when they are aggregated by city and month.

Population denominators are 2019 city-level estimates from the 5-year *American Community Survey*.

This is a project by *RISE Lab* at BU to help inform data-driven and community-based responses to bend the curve on city gun violence.

Portland, OR

Gun homicides in 2020

# Exposure to gun homicide in home census tract

Children 5-17 years, by race

Multnomah County, 2020

# COVID-19 Race and Ethnicity Data

	Clackamas	Multnomah	Washington	Yamhill	Total
No. of Cases	13,819	32,663	21,850	3,872	71,843
Hospitalized (% ..	7%	10%	6%	3%	7%
Deaths	200	564	221	69	1,037

The demographics reflected here are those defined by and required for collection by the Centers for Disease Control. These categories do not reflect biological difference; they reflect difference in experiences with racism. We include this information to help our communities understand that COVID-19 might impact groups differently based on categories that reflect the inequitable distribution of the risks of being exposed to COVID-19 and the opportunities to access medical care and COVID-19 testing. This information will help us improve our efforts to prevent the further spread of this virus by understanding which communities are most impacted by health inequity.

Filter by county (default is all)

(All)

Filter by deaths and hospitalized (only filters top graph)

Cases

*Data is updated Monday, Wednesday, and Friday by 10am and includes cases confirmed through the previous day (March 18, 2021).*

## Cases by race/ethnicity and population proportions

Percent of COVID-19 Cases Compared to \* County Population Proportions

# Tracking gun violence

Dashboards should:

1. Monitor cases in real time
2. Measure racial disparities & other inequities
3. Highlight social determinants
4. Reflect community input
5. Track progress against ambitious, achievable goals

Thank you!
