HEALTHY BIRTH INITIATIVES

FATHER INVOLVEMENT PROGRAM

THE HBI FATHER INVOLVEMENT PROGRAM understands that active, involved fathers are the strongest protectors of infants and mothers against poor health outcomes and death. Involved fathers also provide children and mothers with protection against non-medical factors such as stress, limited social support, limited economic resources, racism, and discrimination. The HBI Father Involvement program works to support fathers or partners in being the very best parent and co-parent by providing services that are community-based, culturally responsive, and relevant.

SERVICES INCLUDE:

- Father-Focused Advocacy
- Father Focused Case Management
- Personal Goal Planning
- Referrals for Mental Health Services & Support
- Family Planning Assistance
- Referrals and Links to Community Resources (legal, employment, child support, OHP, record expungement, etc.)
