**Program Characteristics:** 

# **Executive Summary**

Maternal, Child, and Family Health (MCFH) Administration provides leadership, compliance, quality, and program data oversight and support to MCFH programs within the Public Health Division. MCFH Administration is committed to addressing health equity, and providing culturally responsive home visiting and other perinatal, parental, and family programing. Administration assures compliance to program and fiscal standards.

# **Program Summary**

MCFH Administration supports the following programs: Healthy Birth Initiatives; Nurse Family Partnership; Healthy Families, Healthy Homes Asthma Home Visiting, and Community Based Health Consulting. It ensures that service delivery effectively improves health outcomes and reducing racial/ethnic disparities in perinatal and birth outcomes, with the ultimate goal of eliminating inequitable perinatal disparities and creating foundations that improve the health and wellbeing of generations to come.

Administrative functions include fiscal and programmatic compliance; health information technology management; and quality assurance. These functions support assessing and evaluating partner, client, and service delivery needs, based on program outcomes; overseeing contracts, billing, health information data systems, compliance with Local, State, and Federal guidelines; and implementing quality and process improvements. Leadership functions include program management, partnership engagement, and health equity-focused strategic planning. These functions support and enhance program staff, program leadership, clients, community-based service-delivery partners, and other County programs to set the strategic direction for MCFH programs. Examples include working to shift the MCFH workforce culture toward the elimination of racial/ethnic disparities by implementing culturally reflective and responsive programs and meaningful community partnership engagement.

MCFH monitors local and national maternal and infant health data, as well as program-level data, including maternal mortality and morbidity, preterm birth, low birth weight, breastfeeding, income, and safe sleep indicators. MCHF programs reach populations most impacted by perinatal disparities through targeted marketing and outreach to BIPOC and low-income communities and providers serving these communities, culturally reflective staff and practices, and client engagement and feedback through advisory boards. Clients influence and guide how they engage in MCFH services and hold leadership roles in the advisory boards and provide input to influence program design and/or implementation.

### **Significant Program Changes**

Last Year this program was: FY 2021: 40097 Maternal Child Family Health Management

COVID-19-Related Impacts - In FY21, COVID-related changes to County and partner workflows reduced referrals to and services provided by MCFH programs. Staff were reassigned to COVID-19 response activities, and in-home services were transitioned to telehealth services, all of which reduced visit numbers and targeted case management revenue. FY22 budget and performance numbers project a return to some in-person services and an associated increase in number of families served. Staff will continue to support COVID-19 response for MCFH clients.
